Label Detective

Session 4 · Fudgy Banana-Oat Brownies · Team activity sheet

SESSION	RECIPE	TIME	GROUPS	FORMAT
4	Brownies	~10 min	Pair of teams	Compare & discuss

THE CHALLENGE

Compare a **real store-bought brownie/snack bar label** against your **homemade Fudgy Banana-Oat Brownie**. Same category of food, very different ingredient lists — spot the differences and explain what they actually mean, not just which one "sounds healthier."

COMMERCIAL BROWNIE BAR

Per 1 bar (45 g serving)

NUTRIENT	
Energy	**210 kcal**
Fat	**11 g**
of which saturates	**6.2 g**
Carbohydrate	**26 g**
of which sugars	**19 g**
Fiber	**1.1 g**
Protein	**2.5 g**
Salt	**0.15 g**

INGREDIENTS (IN ORDER ON THE LABEL)

Sugar, wheat flour, palm oil, glucose syrup, cocoa powder (8%), whey powder, dried egg, raising agents (E500, E503), emulsifier (soy lecithin), salt, natural flavoring.

YOUR HOMEMADE BROWNIE

Per 1 square (1 of 9 from the tray)

NUTRIENT	
Energy	**~180 kcal**
Fat	**~9 g**
of which saturates	**~1.8 g**
Carbohydrate	**~20 g**
of which sugars	**~9 g**
Fiber	**~3 g**
Protein	**~7 g**
Salt	**~0.1 g**

INGREDIENTS (FULL RECIPE)

Ripe banana, peanut butter, cocoa powder, rolled oats, egg, honey, baking soda, salt.

YOUR FINDINGS

Fill this in together as a pair of teams

Teams: _____ Players: _____

1. Which one has more sugar, and where does that sugar come from in each? (added sugar vs. sugar from whole food)

2. Count the ingredients on each label. What do the "extra" ingredients on the commercial bar actually do?

3. If you only had 5 minutes before training and could grab one of these two, which would you pick — and why?

Sugar winner:

Shorter ingredient list:

WRAP-UP

The label doesn't lie, but it also doesn't explain itself — reading the numbers is only half the job. Knowing what they mean for you, right before you train, is the other half.
