# Energy Ball Challenge

Session 3 · Energy Balls · For the teams — post at the swap station

| SESSION | RECIPE | TIME | PICK | FOR |
|---|---|---|---|---|
| 3 | Energy Balls | ~10 min | 1 swap per team | The teams |

## THE CHALLENGE

Set aside 3-4 balls' worth of mix and pick **one** swap below to stir in or roll them in. While the tray chills, agree as a team on **one sentence**: what you changed and whether it's still good pre-training fuel. No writing needed — just be ready to say it out loud.

### Dried Cranberries or Raisins

Stir a spoonful in instead of a couple of the dates.

**Still fast-carb · slightly less sweet · a bit more fiber**

### Ground Cinnamon

Add a pinch straight into the mix before rolling.

**Flavor only · no real nutrition shift · safe pick**

### Shredded Coconut

Roll the finished balls in it for a coating.

**A little extra fat · still fine right before training**

## HOW IT RUNS

1. After rolling the base batch, set aside **3-4 balls' worth** and pick one swap above.
2. While it chills, agree on **one sentence**: what changed and why it still works as pre-training fuel.
3. Once trays come out, give a **15-second spoken pitch** to a neighboring team and offer a taste.

## REMEMBER

Almost any swap here still works — the real skill is knowing **why** it still works, not just that it tastes good. That's the difference between guessing and actually understanding your nutrition.
