Rice Cake Bar: Menu

Session 6 · Rice cake bar · Table sheet

SESSION	RECIPE	TIME	GROUPS	FORMAT
6	Rice cake bar	~15 min	Table team	Build & explain

THE SIX TOPPINGS

A rice cake is mostly quick carbs with very little protein or fibre: the topping does the work.

TOPPING	WHAT GOES ON IT	WHAT IT BRINGS	GOOD FOR
1 · Peanut butter + banana	1 tbsp peanut butter, ¼ banana sliced	Quick carbs, protein and fat	Light pre-training bite, breakfast
2 · Avocado + tomato + lemon	¼ avocado mashed, tomato, lemon, salt	Healthy fat, vitamin C	Savoury breakfast, light dinner (fat digests slowly)
3 · Soy yogurt + berries + seeds	2 tbsp soy yogurt, berries, seeds	Protein, carbs, fibre	After training, snack
4 · Hummus + cucumber	1 tbsp hummus, cucumber slices	Plant protein and fibre	Snack, light dinner
5 · Tahini + date	1 tsp tahini, ½ date chopped	Fast sugars, fat, calcium	Sweet breakfast, a quick energy bite
6 · Tomato + olive oil + salt	½ tomato rubbed on, olive oil, pinch of salt	Light carbs, a little salt	Breakfast classic, hot days

BUILD YOUR TWO

Pick a topping for each moment and say why in one sentence.

MOMENT	MY CAKE	WHY
1 to 1.5 h before training		
Within 1 h after training		

MAKE IT COUNT

- Which topping would still leave you hungry? What would you add to fix it?
- Which one would you avoid right before training, and why?

WRAP-UP

There is no perfect breakfast: there is the right one for the moment. The same rice cake changes completely with what you put on it.
