~ estimated values per serving

PREPARATION

1. Mash your fruit **in the container** with a fork: banana with cocoa, berries, or mango with coconut.
2. Add the chia seeds and the soy drink (and the syrup, if using) and stir for **1 min**.
3. Wait **10 min** and stir again so the seeds do not clump.
4. Close the lid and chill for **at least 4 h**, ideally overnight.
5. Eat cold within **3 days**, topped with fruit or nuts.

NUTRITION NOTE

Chia seeds soak up the liquid and turn into a gel, adding fibre and plant omega-3 fats. The pudding is light on quick carbs, so on heavy training days add banana, oats or mango. Values shown are for the banana and cocoa flavour. Contains soy: check allergies.
