|---|---|
| ~18 g carbs | ~8 g fat |

~ estimated values per serving

## PREPARATION

1. Pick a rice cake and **one topping** from the menu.
2. Spread or layer the base first: peanut butter, avocado, yogurt, hummus, tahini or tomato.
3. Add the extras on top: banana, berries, seeds, cucumber or date.
4. Eat it **right away**: rice cakes go soft after about 15 min.
5. Make two: one for **before** training and one for **after**. What does each one need?

## NUTRITION NOTE

A rice cake is mostly quick carbs with little protein or fibre, so the topping decides what the snack does for you. Values shown are for peanut butter and banana. Contains peanuts, soy and sesame (tahini, hummus): check allergies.
